

Very informative; it builds off of previous experiences and prior knowledge as well as prepares for future lessons.

– Ann Arbor Academy, Battle Creek teacher

SPECIAL OPPORTUNITY for Michigan schools

I think this is a great introduction to energy resources and the importance of an individual's conservation efforts. ... It stimulated a great deal of discussion.

– Moccasin Elementary, Galien parent

Michigan energy companies support teachers in educating students on required energy standards. The **THINK! ENERGY** program will take place at schools in your area **AT NO COST!**

Teachers and students learn about energy by taking part in a presentation at school and installing energy-efficient products at home with their families.

- In-school presentation (50-60 minutes)
- Every student receives a *Take Action Kit* of energy-efficient devices
- Program correlated to GLCEs, NGSS and Common Core Standards
- Easier implementation and new online data option
- Teachers earn a mini-grant of up to \$100, subject to eligibility
- Grades 4-6
- October and November, 2016
