Think Energy Program

		Pre-	·sur	vey				
	Complete prior to watch	ing the introductory p	rese	ntation. Answer to	the l	best of your ability.		
1.	Which is a nonrenewable	resource?						
	Coal	Water		Wood		Sunlight		
2.	What do you call a resou	hat do you call a resource that is naturally replaced and goes on and on?						
	Nonrenewable resource	Flow resource		Renewable resource		Secondary resource		
3.	Light-emitting diodes (LE	ht-emitting diodes (LEDs) can reduce energy used for lighting in your home by up to 90%.						
	True	False						
4.	Windows and doors should be closed when the furnace or air conditioner is operating.							
	True	False						
5. Which of the following would help conserve energy and natural resources?								
	Using incandescent I	ight bulbs		Turning off lights				
	Leaving the thermostat at the same setting all year long			Asking an adult to set your water heater temperature higher				
6.	6. Which natural resource do we use to generate electricity?							
	Gasoline	Natural gas		Vegetable oil		Rocks		
7.	Food has what type of er	ood has what type of energy?						
	Kinetic energy	Gravitational potential energy		Stored energy		Elastic potential energy		
8.	What is it called when a	device uses power wher	n it is	turned off?				
	Conductor	Phantom load		Insulator		High efficiency device		
9.	9. Conserving water also conserves energy.							
	True	False						
10	. Energy efficiency means.							
	Not being able to meet our needs with energy			Not using energy				
	Using less energy to	achieve the same		Not thinking about	our 6	enerav use		

Post-survey

Complete **after** returning the completed *Home Energy Worksheet* (HEW). Answer to the best of your ability. Pre-survey questions are numbered 1 to 10. Post-survey questions are the same but numbered 11 to 20.

11.Wh	ich is a nonrenewable re	source?					
	Coal	Water		Wood		Sunlight	
12. WI	nat do you call a resource that is naturally replaced and goes on and on?						
	Nonrenewable resource	Flow resource		Renewable resource		Secondary resource	
13. Lig	ght-emitting diodes (LEDs) can reduce energy used for lighting in your home by up to 90%.						
	True	False					
14. Wi	ndows and doors should be closed when the furnace or air conditioner is operating.						
	True	False					
15. WI	nich of the following would help conserve energy and natural resources?						
	Using incandescent lig	ht bulbs		Turning off lights			
	Leaving the thermostar all year long	t at the same setting		Asking an adult to s temperature higher	et yo	our water heater	
16. WI	hich natural resource do	ich natural resource do we use to generate electricity?					
	Gasoline	Natural gas		Vegetable oil		Rocks	
17. Fo	od has what type of ene	rgy?					
	Kinetic energy	Gravitational potential energy		Stored energy		Elastic potential energy	
18. WI	hat is it called when a de	vice uses power when	it is	turned off?			
	Conductor	Phantom load		Insulator		High efficiency device	
19. Co	nserving water also cons	serves energy.					
	True	False					
20. En	ergy efficiency means						
	Not being able to meet energy	our needs with		Not using energy			
	Using less energy to ac	chieve the same		Not thinking about o	our e	nergy use
