

# Teachers,

Encourage students to slow the flow by installing the high-efficiency showerhead from their *Take Action Kit* and earn *another* reward through the **Water Hero Challenge!**

## Here is how to lead the challenge:

- 1** Copy and distribute the messages from the back of this sheet to students after they receive the *Take Action Kits* to encourage showerhead installation.
- 2** Have students complete the *Home Energy Worksheets* (HEWs) on paper or online by the program deadline.
- 3** When 35% or more of your students mark "Installed" on the HEW, teachers will receive a lightweight solar powered lantern with 60 lumens of usable light on high and 35 hours of run time.

## Two ways to earn rewards for your participation!

### HEW Reward\*

### Water Hero Installation Challenge:

35% or more of your class marks showerhead "Installed"

← TEACHERS →

← STUDENTS →

\*For full details on earning a second gift card, see the *Rewarding Results Flier*.

Be a water hero and slow the flow by installing the high-efficiency showerhead in your *Take Action Kit!*

When 35% or more of your child's class marks "Installed" in the showerhead section of the *Home Energy Worksheet* (HEW), your child will receive a fun LED finger beam light from Xcel Energy. If you cannot use the showerhead, please give it to a neighbor who can use it. You can complete the HEW question for the user of the showerhead.
